

Guidelines for Handling Yard Debris

Our landscaping contract does not include curbside recycling of yard debris. We appreciate the fact that we have volunteers and homeowners who work on their own to help maintain the appearance of our HOA. As a courtesy, Sierra NW Landscaping has agreed to pick up the pruning material that our volunteers and homeowners generate from time to time. In doing so, we ask everyone to cooperate by following the guidelines below:

- Small amounts of pruning material should be included in your personal trash container that is picked up each week by Republic Services.
- If the amount is too large for your trash bin, place it in a container or bag, or if branches in a pile and at the curb or guest parking area where it will be seen by the Sierra NW crew.
- Sierra NW is normally here on Tuesday. Yard debris bags and containers should be set out for pick up on that day just like we do with our trash containers. If, for some reason it does not get picked up, it should be removed from view and set out again the following week.
